

1 fluid ounce (30 ml)

DermaStem is a breakthrough serum that revitalizes the skin at the cellular level, to restore and maintain the skin's youthful vibrance. DermaStem's all-natural ingredients provide the ideal environment for the regenerative properties of the adult stem cells, supporting the natural process of skin renewal.

THE VERY BEST INGREDIENTS, EITHER CERTIFIED ORGANIC OR WILD-HARVESTED ARE BLENDED WITH INNOVATIVE PROCESSING TO PRESERVE EACH INGREDIENT'S DELICATE ESSENCE.

DermaStem contains absolutely nothing artificial. It is an emulsion of dozens of ingredients gathered from around the world that work individually and in concert to regenerate the skin, while also fighting the effects of oxidative stress and other harmful internal and external triggers that cause premature aging of the skin. Sound-wave sanitizing technology called SoniPure™ and cold processing preserves the very fabric of each plant for unprecedented effect.

Early clinical tests have demonstrated dramatic results (see graph).

FEATURES	BENEFITS
Dozens of organic or wild-harvested plants with individual properties to fight the signs of premature aging have been assembled from around the world	A unique product that can give back to your skin its youthful appearance.
Plants are extracted using a cold infusion process directly in Cyathea Medularis (Black mamaku), Aloe Barbadensis (aloe vera) and berry juices: The delicate essence of all plants is preserved	Each anti-aging ingredient is delivered in its most powerful, effective form for greatest benefit.
No petroleum derivatives, preservatives or chemicals	The all-natural emulsion of natural oils disappears instantly into the skin for immediate effect and no residue, without potential toxicity.
Exclusive to DermaStem: RejuvHyal™, a proprietary form of N-acetyl-glucosamine that supports the structure of the skin for a smoother, younger-looking appearance	A tighter and smoother skin with a younger looking appearance and radiant glow.
Exclusive to DermaStem: A blend of six Cytokines that stimulate the proliferation and migration of the skin's adult stem cells	Outer vibrance comes from renewal and rejuvenation of the surface of the skin, producing a more youthful appearance.

INGREDIENTS

All Natural Ingredients (Common Name):

Black mamaku juice, Aloe vera juice, Berry juices reconstituted in high vibration Enki™ Water (Maqui berry, Pomegranate, Wild bilberry, Wild lignonberry, Blackcurrant, Aronia, Wild blueberry, Concorde grape, Sour cherry, Wild elderberry, Wild cranberry, Red raspberry, Black raspberry), Coconut oil, Safflower oil, Nilotica butter, Olive oil extract, Cocoa butter, Soy lecithin, Chilean soapnut, RejuvHyal™, Honeysuckle, Rosa mosqueta, Mekabu (fucoidan), Bitter orange extract, AFA, Bentonite clay, Aspen bark extract, Lactobacillus ferment, Vitamin E (Sunflower), Genistein, Old Man's weed, Amla, Vanilla, Colostrum, Green tea extract, Olive extract (Hydroxytyrosol), Guar, Moringa, Sangre de drago, Cacao, Samambaia, Cytokines, Jasmine oil, Sweet orange, Bulgarian rose oil, Tangerine oil.

FAQ'S

What is DermaStem™ Renewal Serum?

DermaStem is the only skin care product that taps into the potential of skin stem cells to revitalize the skin at the cellular level. Its all-natural formula includes dozens of ingredients taken directly from the forests and jungles of the world, and combined in an emulsion of natural oils.

How is DermaStem different from other creams and lotions marketed to fight the signs of premature aging of the skin?

DermaStem is the only product on the market that works at the cellular level by supporting the natural role of the stem cells present in the skin, leading to a more youthful appearance. In addition, DermaStem is processed using cold infusion that preserves the delicate essence of each plant as well as a sound-wave sanitizing technology called SoniPure™.

How does DermaStem work at the cellular level?

The elements in DermaStem's formula provide the ideal environment for the regenerative properties of the skin's stem cells. By supporting the proliferation of skin stem cells and providing the building blocks of the skin matrix, DermaStem increases skin's elasticity and moisture retention in the skin, leading to a smoother skin surface. DermaStem also provides strong antioxidants to protect the skin.

What is the role of hyaluronic acid (HYA) in the skin, how is the loss of HYA in the skin linked to premature aging, and how is DermaStem addressing the situation?

The matrix of the skin is made of a complex interaction of proteins and glycosaminoglycans (GAGs) of which hyaluronic acid (HYA) is one of the most important. In a young skin, HYA is highly branched, but as we age the skin's ability to synthesize branched HYA decreases. Highly branched HYA, as seen in young skin, can absorb up to 1000 times its weight in water. The loss of branched HYA therefore leads to dryness, loss of skin integrity and wrinkle formation. DermaStem contains RejuvHyal™, a proprietary form of N-acetylglucosamine, that is a unique ingredient supporting the formation of branched HYA in the skin. The presence of cytokines and other ingredients that support the function of skin stem cells further supports the rejuvenation of the skin.

USAGE

Place 1 to 2 pumps onto fingers, apply and smooth around face, starting with delicate areas. Use morning and night, on a clean slightly damp face.

One vessel/container will last 2 months, if one uses 2 pumps of the product 2 times a day.

Refrigeration is suggested to preserve intact the delicate bioactive properties of this serum.

FOR YOUR INFORMATION

Ingredients are either organic cert and grown or wild harvested.

No petroleum derivatives, preservatives or chemicals are part of either the formula or the processing.
